Page no	Fig/Photo	Thumbnail	Alt-text Description
9	fig1.jpg	 The figure consists of four subplots arranged in a 2x2 grid. The top-left plot is titled 'Growth in fiber direction' and shows 'Distance' on the y-axis (ranging from 0.95 to 1.00) versus 'Time' on the x-axis (ranging from 0 to 200). The top-right plot is titled 'Growth in crossfiber direction' and shows 'Distance' on the y-axis (ranging from 0.95 to 1.00) versus 'Time' on the x-axis (ranging from 0 to 200). The bottom-left plot is titled 'Stretch in fiber direction' and shows 'Stretch ratio' on the y-axis (ranging from 0.95 to 1.00) versus 'Time' on the x-axis (ranging from 0 to 200). The bottom-right plot is titled 'Stretch in crossfiber direction' and shows 'Stretch ratio' on the y-axis (ranging from 0.95 to 1.00) versus 'Time' on the x-axis (ranging from 0 to 200). A legend at the bottom identifies the line styles and colors for five conditions: LT2 (solid orange), KFR (dash-dot blue), GEG (dotted green), GCG (dash yellow), and KOM (dash-dot light blue).	Four-panel figure showing X-Y charts of growth and stretch in fiber and crossfiber directions over time. Each panel displays different line styles and colors representing various conditions: LT2 (solid orange), KFR (dash-dot blue), GEG (dotted green), GCG (dash yellow), and KOM (dash-dot light blue). The top panels depict "Growth in fiber direction" and "Growth in crossfiber direction," with the y-axis labeled as Distance. The bottom panels show "Stretch in fiber direction" and "Stretch in crossfiber direction," with the y-axis labeled as Stretch ratio. The x-axis for all panels is labeled Time. A legend at the bottom identifies the line styles and colors.
10	fig1.jpg	 The figure consists of four subplots arranged in a 2x2 grid. The top-left plot is titled 'Growth in fiber direction' and shows 'Distance' on the y-axis (ranging from 0.95 to 1.00) versus 'Time' on the x-axis (ranging from 0 to 200). The top-right plot is titled 'Growth in crossfiber direction' and shows 'Distance' on the y-axis (ranging from 0.95 to 1.00) versus 'Time' on the x-axis (ranging from 0 to 200). The bottom-left plot is titled 'Stretch in fiber direction' and shows 'Stretch ratio' on the y-axis (ranging from 0.95 to 1.00) versus 'Time' on the x-axis (ranging from 0 to 200). The bottom-right plot is titled 'Stretch in crossfiber direction' and shows 'Stretch ratio' on the y-axis (ranging from 0.95 to 1.00) versus 'Time' on the x-axis (ranging from 0 to 200). A legend at the bottom identifies the line styles and colors for five conditions: LT2 (solid orange), KFR (dash-dot blue), GEG (dotted green), GCG (dash yellow), and KOM (dash-dot light blue).	Four-panel figure showing X-Y charts of growth and stretch in fiber and crossfiber directions over time. The top panels display "Growth in fiber direction" and "Growth in crossfiber direction," with the y-axis labeled as Distance. The bottom panels show "Stretch in fiber direction" and "Stretch in crossfiber direction," with the y-axis labeled as Stretch ratio. Each chart includes multiple lines representing different conditions: LT2, KFR, GEG, GCG, and KOM, as indicated in the legend. The x-axis for all charts is labeled as Time.
